

# FORCE ANALYSIS THROUGH THE DIGITAL LENS

**JANUARY 20, 2026 - 0800-1600**  
1805 Cornwall Rd, Lebanon, PA 17042

Unlock the power of digital video in today's investigations. This course gives you practical, reliable techniques for capturing, interpreting, and analyzing video evidence—crucial in use-of-force cases. Learn how video really works, how it differs from human perception, and how to avoid common mistakes that can jeopardize an investigation.

Topics include perception, decision-making, memory, response time, video devices, acquisition, interrogation, and analysis. Using real case footage, you'll master strategies to accurately assess time, distance, speed, motion, and key human performance factors.

Gain the skills that elevate your investigations and strengthen your findings.
